

Either to **SECURE** your **PRODUCTION**
or to do some **TAPPING TESTS**, we offer you
RENTAL OF AN M400 CONTROLLER

(Backward compatible with older
V3000 & M400 v1 systems)

REF: 9150-1001-A

Secure your production:

The M400 controller is the brain of your servodriven tapping unit. To secure your production we offer you this rental service for controller.

Thus during maintenance of your controller, you will be able to continue with production.

Tapping test:

During tuning of your dies, its often necessary to stamp parts in production conditions.

For these operations, a rental controller can let you test-tap parts, and tune your die.

For all kind of tapping unit:

The rental controller is equipped with 2 servo-drives for using either a ABB or a Schneider motor and up to 2 motors at a time (Compatible with V3000).

Just be sure that your motor is 400V AC, 3-phases powered.

- **Invoicing per week** of use
- **Minimun of invoice:** invoicing is charged in 1 week increments with 1 week minimum charge.
- **Transport:** at the customer expense
- **Repair charge** are applicable in case of damage to the equipment at customer expense

If you need a M400 controller for a temporary need, please contact us
